“Legislation and recyclability targets: the use of post-consumer material within the legislative framework and relevant test methods”

15:30 – 16:00 COFFEE BREAK

16:00 – 17:30

- **Martino Colonna** – Alma Mater Studiorum University of Bologna, Associate Professor - Department of Civil, Chemical, Environmental, and Materials Engineering
“Case studies of recycling projects of sport equipment and textiles”
- **Iacopo Bianconcini** - SACMI, Marketing Manager & Product Development – Rigid Packaging Technologies
“Close the circle with SACMI. The green transition in caps: PURECAP™ ”
- **Riccardo Lamperti** – LyondellBasell, Brand Owner Manager Circular & Low Carbon Solutions
“Paving the way to a circular future”

MARTYNA FONG - AMI

Martyna has extensive experience in research and consultancy in both FMCG and downstream plastics markets. She has a comprehensive understanding of the value chain and changing market dynamics, all in the context of sustainability driven initiatives.

Having joined AMI in 2011, Martyna has led the company's expansion of Packaging & Recycling portfolio, focusing on strategic new products and service development to assist the plastics industry in meeting its sustainability goals. As Director of Market Intelligence, Martyna is leading the team of market experts at AMI, looking after research programmes and holistic portfolio development.

PAOLO GLEREAN – ALIPLAST SPA

Paolo is Board Member and Head of Sales and Marketing at Aliplast SpA, with responsibility for institutional affairs.

He has over 25 years of experience in the plastics and recycling industry, combining executive leadership, business development, and technical expertise. He is actively involved in key European and national industry associations: board member of Plastics Recyclers Europe Association since 2012 and chair of the RecyClass Platform, board member of Assorimap since 2013, and past president and vice-president of PET Sheet Europe (EuPC) since January 2019.

He has contributed significantly to the development of plastics recycling standards, innovation, and circular economy initiatives across Europe.

FABRIZIO DI GREGORIO – PLASTICS RECYCLERS EUROPE & RECYCLASS

Fabrizio Di Gregorio received an Honors Degree in Environmental Science and Technology and a PhD in Industrial Engineering from the University of Naples. He spent 10 years as researcher and lecturer at the University of Naples in mechanical, chemical and biochemical processes, as well as in life cycle assessment. He was invited lecturer at the Denmark Technology University and at the Technology University of Wien. He spent 2 years as R&D manager at CONAI, the Italian EPR scheme.

From 7 years he is Technical Director of Plastics Recyclers Europe and RecyClass, a technical value chain initiative. With its scientific-based approach RecyClass is supporting the plastic value chain in advancing on recyclability and recycled content traceability.

MARTINO COLONNA – ALMA MATER STUDIORUM UNIVERSITY OF BOLOGNA

Martino Colonna is an associated professor at University of Bologna where he has founded and direct the Sport Technology Lab that works in the development, design and testing of materials for sport equipment.

He is also involved in several projects related to sustainability and he is CEO of a start-up named Re-SPORT that develop recycling processes for sport equipment, textiles and everyday life goods. He is scientific coordinator of 4 LIFE projects on recycling of sport equipment and he is supervisor of 4 MSCA-DN PhD positions on sport shoes sustainability.

He is also founder of other two startups (O-DAMP and MOTORIALAB) active in the field of sport equipment and safety. He is author of 88 scientific papers on peer reviewed journals, of 3 books and 5 book chapters and of over 30 international patents.

IACOPO BIANCONCINI – SACMI

Mr. Iacopo Bianconcini joined SACMI Group in Imola, Italy, 25 years ago. He graduated in Management Engineering at Greenwich University in London, plus Master Educated in Marketing, Innovation Management and Digital Transformation at SDA Bocconi of Milan and Columbia University of NY.

As a Manager in SACMI Imola Headquarter, he is directly responsible for Marketing and Product Development activities within the Rigid Packaging Technologies Division.

His former experience as Sales Area Manager and Key Account Manager is a valuable and helpful background for his present role.

RICCARDO LAMPERTI – LYONDELLBASELL

Riccardo is a Brand Owner Manager at LYB. He has over twenty years of experience in business development and key account management in the plastic industry.

In his current role, he drives collaboration with brand owners to turn post-use plastics into everyday products.

The Circular and Low Carbon Solutions team works closely with Product Sustainability and Packaging Specialists to enable the recycling of plastic waste and greenhouse gas emission reductions in compliance with emerging regulations.
